

SAPPORO MEDICAL UNIVERSITY

Aiming to be a top-class medical university

Sapporo Medical University, whose predecessor was Hokkaido Women's Medical College, was established in 1950 as the first medical university under Japan's new postwar medical university system. At first, there was only the School of Medicine. In April 1993, the School of Health Sciences, consisting of the Department of Nursing, the Department of Physical Therapy and the Department of Occupational Therapy, was established. Then, in April 2007, Sapporo Medical University made a fresh start as a Hokkaido public university corporation. Today, it has grown to become a medical university with approximately 1,500 undergraduate and graduate students and 1,500 teachers in its two schools and four departments.

Check!

We welcome international exchange students from Vietnam!

Sapporo Medical University's international exchanges are promoted mainly by the Committee for International Affairs and Medical Exchanges and the Department of International Affairs and Medical Exchanges. The Department of International Affairs and Medical Exchanges is positioned as an administrative body to implement affairs related to international exchanges.

If you are a medical student and interested in coming to SMU for a learning experience either in Basic Medical Sciences or Clinical Sciences, please email us. For formal application, a resume, a letter of recommendation from the Dean of your medical school, a health certificate (including your immunization record), and some additional documents are necessary. Please contact us at:

The world's first efforts

Sapporo Medical University has started Japan's first clinical trial using stem cells for nerve regeneration in patients with spinal cord injuries from 2014.

So, our university is pursuing excellent research leading to the world premier international research, such as regenerative medicine for cerebral infarction and spinal cord injury, and development of cancer vaccine.
