- Major in Liberal Arts

Sapporo University Women's Junior College
Department of Career Design

Mission:

Sapporo University aims at training students to contribute to our society in a way that goes beyond national boundaries under the philosophy of "Chiiki Kyosou," which means creating new value in our region by collaborating with others. Gathering students in SUICC, our regional/international hub, we provide unique, community-based education.

Features:

Sapporo University Urespa Project : Learning and spreading the history and culture of the indigenous people

The Urespa Project started with the aim of learning and spreading the history and culture of the Ainu for our society to pass down to the next generation (the word "Urespa" means "mutual nurturing" in Ainu). With Ainu and Japanese students learning together, we have realized a multicultural, symbiotic lifestyle. Our activities are held on a global scale. Some of our past achievements include introducing Ainu culture at the 2011 Japan Week in Germany, and the 2013 Riddu Riddu Festival in Norway. We often get a visit from overseas students who have interests the Ainu Culture and its language.

Pounding Mochi Party
